

AT&T is bringing our fastest internet to your neighborhood on a 100% fiber network.

Frequently Asked Questions

What is AT&T doing in my neighborhood?

Upgrading the network to deliver ultra-fast internet speeds.

We've been working hard to bring our 100% fiber network directly to your neighborhood—delivering up to 5-Gig speeds.*

What is AT&T Fiber®?

AT&T Fiber is our premium ultra-fast internet service delivered over fiber optic cable.

This is different from traditional cable internet. Fiber has the potential to transmit data at faster speeds than DSL or cable-based internet. In particular, AT&T Fiber now delivers the fastest internet service of any major provider, with speeds of up to 5-Gigs.*

How long is this upgrade going to take?

Our crews will work as fast and efficiently as possible.

Timing to complete depends on the size of the neighborhood, terrain and existing infrastructure. You can count on us to minimize any disruption to your neighborhood.

*Limited availability in select areas. Fastest among major internet service providers, based on 5Gbps offering. Internet speed claims represent maximum wired network service capability speeds to the home and recommended setup. Actual customer speeds are not guaranteed. Single device wired speed maximum 4.7Gbps. For more information go to www.att.com/speed101.
